**GT NETWORK** The Installation Rails of GT NETWORK

free standing cabinets are adjustable through the cabinet depth. **GT NETWORK** series cabinets offer user-friendly and time-saving solutions with the widest accessories range.

Thanks to its Flatpack option, the **GT NETWORK** free standing cabinets take less space in the warehouse and transport and are cost-effective. With the specially designed structure, the cabinets can be assembled and unassembled easily. Simple tools will be enough to assemble the whole cabinet.

The **GT NETWORK** free standing racks will attract you with the color options of new RAL 9005 Smooth Black and RAL 7035 Smooth Light Grey. For different color needs, please contact with our sales team.

The standard front door model for 600mm wide **GT NETWORK** free standing cabinets is the full size glass door with metal frame. The front glass door is 4mm tempered, smoke colored, grinded and highly resistant against breaking. The front door has a lock module for security reasons. The specially designed metal frame adds an aesthetical and decorative appearance on the cabinet besides its strength. The locking mechanism is handle-locking type. The colorful PVC strip located on the metal frame is the complimentary of the whole aesthetic design. The front door with spring loaded hinge system provides ease at the installation and use as it's changeable on the desired direction of opening; removable and installable without the need of any tool.

The standard rear door model for **GT NETWORK** free standing rack cabinets is solid metal door. It is easy to remove especially during relocation, installation and maintenance of the cabinet and system inside. The easily removable rear doors have the barrel locking mechanism.

The standard roof model of **GT NETWORK** cabinets has a highly modern structure with the straight vented surface and PVC corners

20-40 °C operating with color changing function, Mirsan Thermometer tapes are sticking to internal side of glass door, where need of tracing the internal temperature inside the cabinet, mainly used at wall cabinets where strict temperature measurements are not needed (-10/+50 °C operating function, double lithium battery, 2 years life Mirsan Digital thermometers are supplied integrated on decorative **GT NETWORK** cabinets.
