QuPoE Switch SCA6E v2

PoE switch powered by PoE PSU or typical PSU through high power connector

PoE switch dedicated to power:
- 1x Teltonika
- RUT240 / RUT360 / RUT950 / RUT955 / RUTX09 / RUTX10 / RUTX11 / RUTX12 / RUTX14
- and 4x CCTV cameras with active PoE 802.3af/at.
  This switch can be powered by two inputs: passive PoE on LAN_5 or by connecting wires directly to terminal block DC_IN. If both are used simultaneously, the source with higher voltage is the one which supply power to device. This can by used to automatically switch to backup power supply when other (with higher voltage) fails. Terminal block is capable to deliver 130W to powered devices, which is not possible through PoE due limited maximum current of Ethernet cables.

1 x POE IN
Passive 44-60V

1 x POE OUT
Passive 24V

3 x POE OUT
802.3af/at
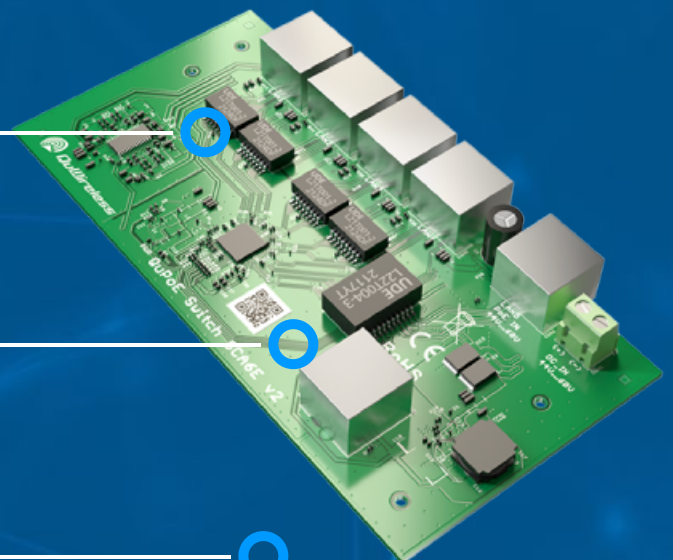

DIRECT DC INPUT 44V ~ 60V, MAX 130W
